

DWA_04.3 Knowledge Check_DWA4

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

Var and Let

- If you reassign references, use “let” instead of “var”, because “let” is block-scoped rather than function-scoped like “var”.

Object-shorthand

- Use property value shorthand. Eslint: object-shorthand, Why? It is shorter and descriptive.

Const

- Use “const” for all of your references; avoid using var. Eslint:prefer-const, no-const-assign, why? This ensures that you can’t reassign your references, which can lead to bugs and difficult to comprehend code.
-

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

String

- Strings that cause the line to go over 100 characters should not be written across multiple lines using string concatenation. Why? I don’t understand.

Parameters

- Never reassign parameters. Eslint: no-param-reassign. Why? I don’t understand.

Class

- Always use class. Avoid manipulating prototype directly. Why? I don’t understand.
